54

72

80 % of Executives Think Automation Can Be Applied to Any Business Decision

33 % of organisations are applying AI

54 % of AI projects make it from pilot to production.

72 % of executives reporting that they have the AI talent they need.

Artificial Intelligence (AI)

Human intelligence exhibited by machines.

Learning, reasoning, perception, and problem-solving.

Machine Learning (ML)

Utilizing historical data.

Discovering patterns and generating appropriate output data.

Deep Learning (DL)

Machine learning techniques mimicking the function of the human brain.

Advanced applications, such as image and speech recognition.

Foundation Model

Generative AI systems

Generating sequences of related data elements (e.g., like sentences).

ORIGINAL

MAIN REASONS WE USE WITH GEN-AI

TO HAVE FUN

TO GET INSPIRED

TO GET HELP

TO GET THINGS DONE

“a baroque painting about artificial intelligence robot” <https://labs.openai.com/>

Map building

Running interviews

Collecting data

Assuring completeness

Collecting feedback

Help Desk

Payslips

Vacations available

Computer problems

SAP transaction

SOP Steps

Knowledge Management

Building SOP

Reassuring consistency

Checking completeness

Assistant

Writing e-mails

Changing tone to less/more official

Giving shapes to thoughts

"Michelangelo's sculpture of David wearing headset helpdesk" labs.openai.com

OIL PAINTING OF PROCESS FLOW

<https://labs.openai.com/e/9rSXY8tz6ZEmO2PP08v2TL6L>

OIL PAINTING OF BUSINESS PROCESS FLOW

<https://labs.openai.com/e/shr6Mlxc6948oGO7ZVfzEzaT>

LIMITATIONS

Inconsistency – each time different answer

Uncertainty – a need to re-check the solution

Inflexibility – low response on rare cases

Explicit – responses narrowed to written / digitalised knowledge

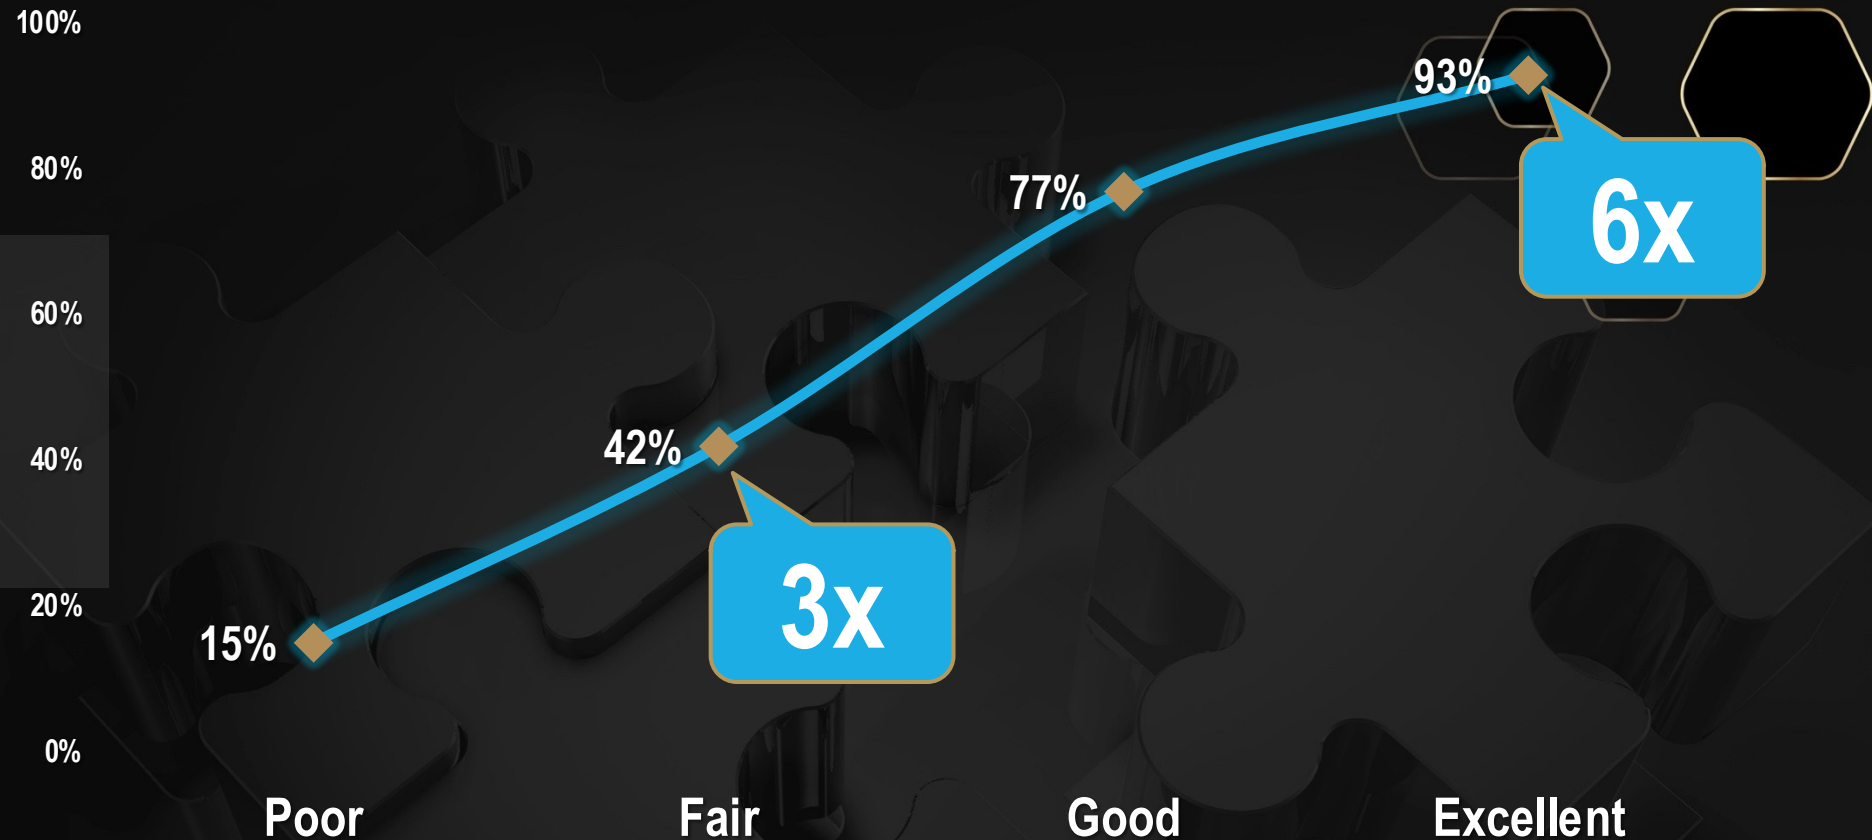

Inaccuracy – errors get multiplied very easy

“oil painting of neanderthals with laptop ” <https://labs.openai.com/>

CHANGE MANAGEMENT – WHY IT IS IMPORTANT?

The more effective change management applied by an organisation, the higher probability to meet or exceed objectives

Source: „The Correlation Between Change Management and Project Success” by Tim Creasey, PROSCI Inc.

STRATEGIC CHANGE MANAGEMENT APPROACH

- 1) STRATEGIC COMMUNICATION
- 2) TRANSFORMATION PROJECTS (INC. TRANSITION)
- 3) SYSTEM OR TOOL IMPLEMENTATIONS

CHANGE IS GOOD

AT THE END OF THE CURVE, CHANGE IS GOOD

The Change Curve:
typical emotional
journey through
change

(by Elizabeth Kubler-
Ross)

AT THE END OF THE CURVE, CHANGE IS GOOD

Goal

Discussing and setting clear, SMART and common and ultimate goal of the change

Communication

Stakeholders map, Communication plan, language alignment

Competences

Competence map, Training scheme, Knowledge Management

Tools

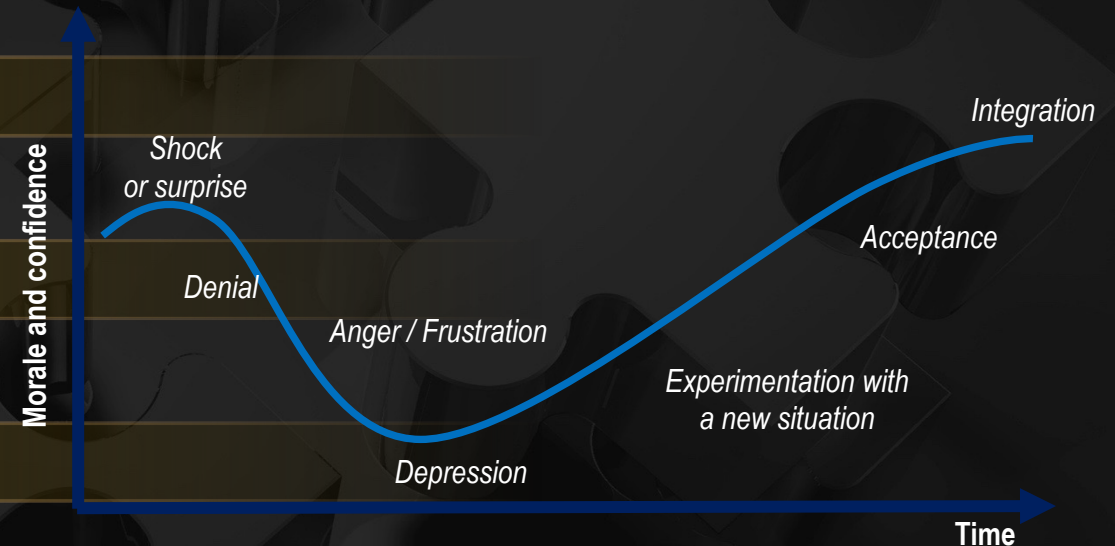

Selection of best suitable tools

Motivation

Keeping a pulse on the motivation towards change

Action Plan

Clear and detailed plan of actions and responsibilities

5 TIPS FOR MANAGING CHANGE EFFECTIVELY

1. Understand the Process of Change

No two change initiatives are the same. But the vast majority of those that are successful follow the steps of the change management process.

2. Understand the Forces of Change

Without this understanding, it can be difficult to effectively address the underlying causes that have necessitated change, hampering your ability to succeed

3. Create a Plan

Without a detailed plan and defined strategy, it can be difficult to usher a change initiative through to completion

4. Communicate

Successful change management requires effective communication with both your team members and key stakeholders. Designing a communication strategy that acknowledges this reality is critical

5. Prepare for Roadblocks

While it is impossible to predict everything that might potentially go wrong with a project, taking the time to anticipate potential barriers and devise mitigation strategies before you get started is generally a good idea

The global generative AI market is approaching an inflection point, with a valuation of USD 8 billion and an estimated CAGR of 35% by 2030. With more than 85 million jobs expected to go unfilled by that time, creating more intelligent operations with AI and automation is required to deliver the efficiency, effectiveness and experiences that business leaders and stakeholders expect.
