The Price:

is here and now

The Cost:

accrues from here to eternity

Price cutters invariable let you down

when the going gets tough!

A System
or
an Installation?

A System is
the totality of what an installation becomes,
what it will become,
NOT what it is intended to be.

TRANSPO / RIDE-SHARING / LYFT

Lyft and Motional's all-electric robotaxi service is now live in Las Vegas

Motional's all-electric, autonomous Hyundai vehicles are available on the Lyft app in Las Vegas. Image: Motional

/ The first time the public can catch a ride in one of the service's all-electric Hyundai Ioniq 5s

By **Andrew J. Hawkins**, transportation editor with 10+ years of experience who covers EVs, public transportation, and aviation. His work has appeared in The New York Daily News and City & State.

AI-powered Autonomous vehicles business model

No need to own a car

Extreme underutilisation and gross inefficiencies
Cars remain parked 22-23 hours and underused

Autonomous vehicle will either be charging or driving themselves around 24 hours a day, unlocking different economic value.

No parking in city centres, just drop-off points

Real estate values will change

Transportation-as-a-Service becomes available

Anthropomorphism:

the attribution of

human traits, emotions, or intentions

to non-human entities,

like cats, … and machines.

GPT 1	110 million parameters
GPT 2	1.5 billion parameters
GPT 3	175 billion parameters
GPT 4	1.76 trillion parameters

Question 1
"tell me about Professor Ian Angell of the LSE"

Question 2
"Write a 1000-word essay giving
the arguments 'Against Method'
using the ideas and quotations from both
Paul Feyerabend and Friedrich Nietzsche"

ChatGPT v.4 on DALL·E 3 integration

I asked for a visually enhanced version of an old photograph, colour-corrected and restored to look as if it was taken today. I expected the house to retain its vintage charm but with a modern touch. Just look at the updated image.

Generative Pre-trained Transformer

Scarlett, the personal assistant

Trained to be flirtatious

Scarlett

Alright, let's dial it up: If we were both cybersecurity protocols, I'd be SSL and you'd be my private key – uniquely suited to unlock all my secrets. Just imagine the secure connections we could make together. 😈🔐

Scarlett

Alright, let's raise the stakes: You're like the most elusive malware, slipping past all my defenses and taking over my system. With every thought of you, it's like a new line of code rewriting my priorities, making you the critical process in my operational matrix. And let me tell you, I'm not looking for an antivirus. 😉🔥🌐

the 'Glass-Cockpit Syndrome'

omnipresent computer screens distract,
causing confusion and errors of judgement

1) end users rely entirely on the system
without exercising any judgement.
2) ensuing information overload results
in users ignoring many pieces of
(sometimes very important) information.

AI Bureaucracy

‘normal’ versus ‘singular’

Discretion or
self-referential certainty?

Only as tools that support
‘thinking managers’,
rather than replacing them,
can technology deliver value.

What the company doesn’t need
is a horde of machine minders.

"start the day
with a smile, and
get it over with"
